

Press Release
Colorado Springs, Colorado
March 17, 2006
Press Release - New Patents Issued:

The United States Patent and Trademark Office recently issued a new patent to Radiological Imaging Technology, Inc. (RIT). RIT is a world leader in radiation therapy dosimetry software and the owner of substantial patent rights, which it enforces vigorously.

This new patent is U.S. Patent No. 7,013,228, entitled "System or Method for Calibrating a Radiation Detection Medium." This patent issued on March 14, 2006 is a continuation of U.S. Patent No. 6,675,116 and 6,934,653.

RIT is currently enforcing its rights in the '116 patent, '653 continuation patent in Ohio and Iowa, and will take appropriate steps to enforce the '228 continuation patent.

International patents have been filed for these inventions.
