Press Release - New Patent Issued:

The Japanese Patent Office recently issued a new patent to Radiological Imaging Technology, Inc. (RIT). RIT is a world leader in radiation therapy dosimetry software and the owner of substantial patent rights, which it enforces vigorously. This new patent is JP Patent No. 3817176, entitled "Automated Calibration Adjustment for Film Dosimetry" describes an important new calibration technique.

This patent issued on June 16, 2006.
